

Rescue Ready RetroFit Ladder Information Sheet

About the Ladder – Assembled and Sewn in the USA

- Always Easy to Find: The ladder is conveniently located just below the bottom window sash, ensuring it's exactly where you need it when an emergency strikes. This thoughtful design provides a sense of reassurance and preparedness.
- Sturdy and Reliable: Pre-rigged and anchored to your home's structural components, eliminating challenges with finding and installing traditional escape ladders. This robust construction instills trust and confidence in its reliability.
- Meets ASTM Standards: Tested to meet and exceed ASTM Standard F2175, supporting loads of up to 750 pounds.
- Aesthetic Integration: The ladder seamlessly blends into your home's decor with an elegant design, ensuring it looks great even when not in use. This feature makes potential customers feel that the ladder is a stylish addition to their home.
- Will work on windows with offset openings, such as slider windows.
- Will work on windows with openings between 22" - 44".
- Available with or without the wood cover.
- Will work on double windows, but additional trim work will be needed to optimize appearance. This may involve minor adjustments to the window frame or the addition of decorative elements to ensure seamless integration with your home's design.

Features and Benefits

- Adjustable Length and First-Rung Height: The ladder can be tailored to fit most window heights. Contact us for custom sizes.
- Materials: It is made with 5052 aluminum and polyester webbing for durability. Polyester has high abrasion resistance and a low absorption rate, protecting it from weathering. It has a working load strength of 1200 lbs and a melting point of 500 degrees Fahrenheit.
- Anti-Slip Rungs and Engineered Standoffs: Ensure secure footing and provide space for hands and feet, allowing for a safer descent.

Installation and Design

- Easy Installation: If you can mount a flat-screen TV, you can install the Rescue Ready ladder. It comes with all the necessary hardware. Written and video installation instructions are available.
 - Decorative Wood Cover: Handmade in Norfolk, VA, by firefighters from cabinet-grade plywood, it can be painted to match any room. Cover sizes currently available: 36", 40", 44", 48", 52".
 - Custom Fit for Larger Windows: Additional brackets can be used for wider windows, extending the ladder's versatility.
